

Cloud Security & Service Management

Seminar

The **ISACA Cyprus Chapter** and the **itSMF Cyprus** are co-organizing a one-day training seminar on Cloud Security & Service Management. The seminar will take place on Thursday, January 29, 2015 at KPMG Central Offices Training Center in Nicosia (14, Esperidon Street).

The seminar will provide a comprehensive review of cloud security and service management .

The seminar is based on recognized frameworks (i.e., Cloud Security Alliance, ENISA, ITIL) as well as KPMG experience. During the seminar participants will also run case studies helping a fictional organization to manage and secure its cloud environment. The case studies are based on the processes that a company has to go through when planning and implementing cloud solutions.

The seminar domains include:

- *Cloud Architectural Framework*
- *Cloud Service Delivery Models*
- *Cloud Risk Management and Information Security*
- *Legal issues, Audit, and Compliance*
- *Cloud Service Management*
- *ITIL processes and Cloud*

At the end of the seminar, participants will understand the:

- *Cloud Architectural Framework*
- *Cloud Service Delivery Models*
- *Implications Of Cloud on IT Service Management*
- *Strategic, Tactical & Operational Service Requirements*
- *Cloud Security Challenges & Key Mitigation Requirements*

The seminar is suitable to IT professionals, Information Security Professionals, IT Service Managers, IT Auditors, and anyone looking to obtain knowledge related to cloud security and service management.

SEMINAR FACILITATORS

Edwin Sturrus MSc CCSK,
Sturrus.Edwin@kpmg.nl

Edwin is an advisor within KPMG IT Advisory, The Netherlands. He has been involved in multiple security-related engagements, such as Cloud Security, Identity and Access Management (IAM), Cybercrime, Information Risk Management and IT Audit. Edwin is certified in Cloud Computing Security Knowledge (CCSK), obtained from the CSA (CSA) (license: 331189182876).

Besides engagements, Edwin facilitates courses and lectures concerning Cloud Security. He also writes to international magazines on Cloud Security. Examples of publications are “Orchestrating Hybrid Cloud Deployment: An Overview” (IEEE Computer Magazine) and “IAM in the Cloud” (to be published by Wiley in 2015).

Before he started working for KPMG, Edwin studied Economics and Informatics at the Erasmus University in Rotterdam. He wrote his Master thesis concerning Cloud Computing and Identity and Access Management during an internship at KPMG.

Olga Kulikova MSc CCSK
Kulikova.Olga@kpmg.nl

Olga is a security advisor within KPMG IT Advisory, the Netherlands. She advises companies on Cloud Security, Identity and Access Management, Data Privacy, and Cyber Incident Response. Olga also performs IT assurance and certification audits for various clients in Europe and abroad. Olga is certified in Cloud Security Knowledge (CCSK), obtained from the CSA (license: 562756777088).

Olga writes to international magazines on Information Security (Compact, IEEE, Wiley). Example publications: “Cyber Crisis Management: A decision-support framework for disclosing security incident information”; “Orchestrating Hybrid Cloud Deployment: An Overview”, “IAM in the Cloud” (to be published in 2015).

Prior to joining KPMG, Olga completed a MSc in Management of Technology at TU Delft University, the Netherlands, and partly at Carnegie Mellon University, the USA, with focus on Information Security and Privacy.
